Maleesha Kumarasinghe

Software Engineer – Full Stack

No. 480/6, Thummodara, Kuliyapitiya, Sri-Lanka | +94776234558 | maleeshakumarasinghe@gmail.com
LinkedIn | GitHub | Medium

Professional Summary

Software Engineer with 2+ years of experience building backend services, web applications, and cloud-based solutions using Java, Spring Boot, React, Django, microservices, REST APIs, OAuth, AWS and Azure. Focused on clean code, reliable delivery, and Agile collaboration across full-stack and backend engineering work.

Work History

Software Engineer, 2/2026 – present
Gimme Market – London, United Kingdom (Remote)

- Contributed to a Golf Club Management System by delivering web and mobile features that supported customer experience and marketplace operations.
- Integrated the eBay Marketplace API with n8n workflows to synchronize product listings and inventory, reducing manual work in marketplace operations.
- Developed features with React.js, TypeScript, Spring Boot for microservice-based services, collaborating with senior engineers on scalable delivery.
- Implemented authentication and authorization using OAuth, IAM, and OTP-based verification across platform services.
- Tested, documented, and validated RESTful APIs using Postman, Apidog, and SwaggerHub to ensure reliable integrations and API quality.
- Supported frontend deployment workflows using AWS Amplify and managed source code through Bitbucket following Git version control best practices.
- Collaborated with cross-functional teams in an Agile Scrum environment using Jira and Slack, contributing to sprint planning, daily stand-ups, feature delivery, and engineering discussions.
- Leveraged AI-assisted development tools, including Claude Code and OpenAI Codex, to improve development productivity, code quality, and delivery efficiency.

Associate Software Engineer, 2/2025 – 2/2026
IXD Labs (Pvt) Ltd – Piliyandala, Colombo, Sri Lanka (Hybrid)

- Developed and maintained backend services and RESTful APIs using Spring Boot and Django for Flutter mobile and React web applications.
- Designed secure, scalable APIs and optimized PostgreSQL database operations to improve application performance and reliability.
- Coordinated backend deployments and production releases for the FitConnect mobile application on the Google Play Store.
- Maintained API documentation using SwaggerHub and ensured code quality through SonarQube, peer reviews, and development best practices.
- Collaborated with UI/UX designers, mobile developers, and QA engineers in an Agile Scrum environment to deliver high-quality software.
- Managed source control using Git and GitHub while supporting project planning and team collaboration through ClickUp.
- Participated in technical discussions, production support, and troubleshooting to deliver scalable and reliable backend solutions.

Intern Software Engineer, 6/2022 - 6/2023
LOLC Technologies – Colombo, Sri Lanka (Hybrid)

- Contributed to the development of a large-scale Core Banking platform using Spring Boot and a microservices architecture.
- Developed RESTful APIs and implemented backend functionalities following industry best practices.
- Wrote SQL queries and performed API testing using Postman while maintaining API documentation with SwaggerHub.
- Worked with Git, GitHub, Maven, Jenkins, Argo CD, and CI/CD pipelines as part of the software development lifecycle.
- Collaborated with senior engineers in an Agile Scrum environment through sprint planning, code reviews, and technical discussions.
- Assisted in generating business reports using Jasper Reports and maintained technical documentation using Jira.

Education

MSc in Artificial Intelligence
University of Moratuwa
Katubedda, Moratuwa, Sri Lanka – Reading (2026)

B.Sc. (Hons.) in Information Technology Specializing in Software Engineering
Sri Lanka Institute of Information Technology (SLIIT)
Malabe, Sri Lanka - 01/2020 - 12/2023

Projects & Publication

Katha – Sinhala Phonological Disorder Detection & Therapy App (Research Project)

- Developed a mobile application to detect phonological disorders in Sinhala-speaking children and provide real-time speech therapy support to improve early diagnosis and intervention.
- Technologies: Python, Flask, Flutter, Dart, Firebase, SVM, Reinforcement Learning, GCP, Android Studio
- Publication: "Katha: Sinhala Phonological Disorder Detection and Treatment in Early Childhood" – IEEE

Skills

Programming	DevOps & CI/CD	Testing	Project Management	Database	AI Tools
Java & Spring Boot	Jenkins	Mockito	Agile Methodology	SQL	ChatGPT
Python & Django	GitHub Actions	Junit	Agile Scrum	PostgreSQL	GitHub Copilot
Flutter & Dart	GitHub Workflow	pytest	SDLC	JDBC	v0 by vercel
RESTful API	ArgoCD	Unit Test	Jira	MongoDB	Claude Code
ReactJS	Docker	Swagger	Confluence	Liquibase	Gemini
MVC	AWS Amplify	Postman Test	ClickUp		Antigravity
Microservices	Bitbucket	SonarQube			n8n workflow
Design patterns	GitLab				MCP
Data Structures	RabbitMQ
